

205-0001-14 - BeagleBone .5mm Pitch, 48 Pin QFP/QFN Prototyping Cape Kit

BeagleBone .5mm Pitch, 48 Pin QFP/QFN Prototyping Cape Kit

This prototyping cape can be used to add your through hole and surface mount circuitry to create your own function specific add-on cape to your BeagleBone or BeagleBone Black project. This board is our BeagleBone Through Hole Prototyping Cape bundled with one of our .5mm Pitch, 48 Pin QFP/QFN to DIP adapters which makes it possible to use SMT components on your Schmartboard BeagleBone Prototyping Cape. We have designed in ample room for power and ground connections. Included are 2 of our 2x13 special extra long male headers which are designed to make life easier when adding capes on to your BeagleBone and BeagleBone Black projects. Additionally, for your convenience, we have thrown in a 170 Tie Point breadboard with adhesive back.
