

### SchmartBoard Newsletter

### SchmartDroid

Schmartboard's website is now a free Android application to make it easier for those with Droid phones and tablets to use our website. Users can either search for "Schmartboard" in the Market or go to the [Schmartboard Market page](#) and hit Install.

We hope to be able to support our Apple users soon.

### SchmartBoard Strategic Partners

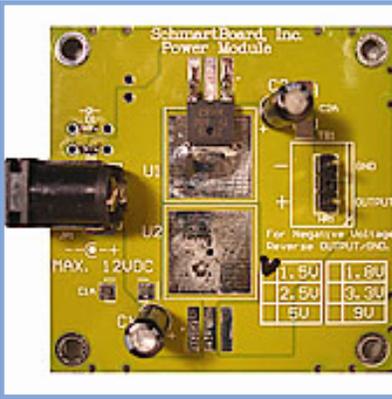

### 2 MAJOR 24 HOUR BLOWOUT SALES IN MARCH!

**March 13th** - We will have a special open to all customers on our popular Schmartboards.

**March 27nd** - We will have a Facebook Only special on our popular Schmartboards.

You have to "Like" us on our [Facebook Fan Page](#) to get instructions on how to take advantage of this opportunity. "Like" us today to assure you can take part.

### MARCH Special - Our Popular Voltage Regulated Modules extended for another month.

20% off our already low-priced power modules.

Our Power modules come in 1.5, 1.8, 2.5, 3.3, 5 and 9 volts. At this price you might want to have different voltage modules available for your future projects.

The offer is good while supplies last.

## Updated Product Roadmap

**Arduino** - With the input of some of our active Arduino users, we have developed a family of Arduino Surface Mount Prototyping shields utilizing our "ez" technology. The first three offerings will support 1.27mm, .65mm and .5mm pitch SOIC components. We are currently in communication with the folks at Arduino to get any last input they may have on our design before we fabricate the first boards. We will follow up with QFP/QFN shields. We hope to start with the first three boards by the end of March.

**Cypress PSOC** - This has been a longer project than expected but we are close to the finish line. We have worked directly with Cypress to create one single development board that supports much of the PSOC 3 and 5 families. It will be in a form factor that allows you to use it on a breadboard should you choose. We believe that we have worked out any bugs and will soon bring it to market. Many of you have been on our tail to get this done and we appreciate your understanding. We of course want to bring you a bug-free board and are lucky to have Cypress as a resource to help assure that this is the case. We are in the final stages of approving the board for production.

## Just for Fun

Schmartboard has created a fun new video in a horror movie genre to promote our brand. Just for fun, we plan to release a new video each month. Some will be corny, some goofy some probably kind of lame...but we enjoy having fun with our products and have no problem laughing at ourselves when the results are in. We know our products are great, so a little fun at our

expense on the creative is okay. Enjoy...or not! :o)

No SUIs  
(Soldering Under the Influence)

My son's name is Joey Hudy and he's a MAKER. He went to his first Maker Faire last May, it changed his life! He has Asperger Syndrome a form of Autism. He never could find his place, but after spending 1 day at Maker Faire San Mateo he did and realized that he was SMART! He fundraised his way to two more Maker Faire's that summer. Over the past months, Joey has changed from a young boy with no direction, into a boy with a love and passion. He has made

it his mission to show others about Maker Faires, what kids can make and getting more STEM into schools. Recently, he was honored to attend the White House Science Fair and show his invention, the Extreme Marshmallow Cannon, to President Obama. Now, the time has come for another summer of Maker Faires' and he can't do it without your help. Thank you in advance for any assistance you can offer. We really appreciate and love being apart of the wonderful MAKING community!

Sincerely, Julie Hudy More information can be found at: [www.](http://www.)
