

SchmartBOARD™ NEWS

See Us At The RoboGames

For those of you in the Bay Area, SchmartBoard will be at the RoboGames, **June 19-21** at Fort Mason in San Francisco. Look for us at the booth of Nuts and Volts/Servo Magazines. SchmartBoard will be introducing **Solder By Numbers**. We will be converting some of the circuits published in Nuts and Volts Magazine and Servo magazine into this new format, which makes it possible to solder together circuits without having the ability to read electronic circuit schematics.

RoboGames is the world's largest open robot competition (even the Guinness Book of World Records says so!) We invite the best minds from around the world to compete in over **70 different events**. Combat robots, walking humanoids, soccer bots, sumo bots, and even androids that do kung-fu. Some robots are autonomous, some are remote controlled - but they're all cool! As an open event, anyone can compete - this means you.

Beta Testers Needed!

Coming soon, a social network for you, the electronics professional and enthusiast. Solderbynumbers.com will be a place to design your electronic circuits while you create a worldwide circuit of peers. The site will be much more than a social network. It will be a place to collaborate, create, communicate and learn. We need people of all levels of

experience from novice to pro. To be considered as a beta tester go to www.solderbynumbers.com to sign up today. The beta test should start in mid-July.

Interns

SchmartBoard is looking for interns who are interested in marketing and business opportunities. Good English skills(written and verbal), are essential. Interested parties can send an e-mail to neal.greenberg@schmartboard.com for further details. It is possible to work with us remotely.

SchmartBoard June Contest Winner

This month's winner of a \$30 combo pack is Tom Brannon of Tempe Arizona. Make sure you are registered to be our next winner!
