

SchmartBOARD™ NEWS

www.solderbynumbers.com is now live. SolderByNumbers(SBN) has been live now for 3 weeks. We hope and expect that it will eventually change the way that you prototype circuits. The great thing is that even if you aren't interested in social networks, SBN allows you to map our electronically where you plan to solder the components. SchmartBoard is all about change. With all the talk about change in the recent presidential campaign, we thought you'd like this non-partisan Professor Schmart cartoon.

Make Money Doing What You Love

On Solder By Numbers, all members are able to use the electronic circuit lab to design circuits in the SBN format on SchmartBoards'. Those who are qualified are welcome to apply for "Developer" status. Developers can publish their circuits for other users to build. Each time a user builds a circuit, the developer receives \$5. Once a lot of circuits are published, a developer can just sit back and receive their quarterly commission payments. Sign Up Today!

SchmartServices

Did you know that SchmartBoard offers a lot of engineering an manufacturing services? This is where we came from and we have never stopped. A number of clients all around the U.S. and beyond know that we are one of the most consistent and aggressively priced service companies around. Let us quote on your next project. Some of the services offered include the following:

- High Level System Design
- Printed Circuit Board Design, Schematics
- PCB Layout
- Mechanical Design
- Small Volume Circuit Board Assembly Manufacturing
- High Volume Turnkey Manufacturing
- Printed Circuit Board Assembly Testing
- Cable Design
- Parts Procurement(From Our Asian Offices)
