Schmartboard™ Universal DIP Adapter Board

Easily snap it to your size

Color Code the Strips

Schmartboard™ Universal DIP Adapter Board

The uses are many. This is a flexible board that allows you to make things fit on your circuit. The board can be broken down into 32 individual strips, each containing 4 holes, or can be kept whole.

- Make SMT parts fit into a DIP socket in conjunction with Schmartboard SMT to DIP adapters
- Used to add power and ground strips capabilities to a circuit
- Color Coding portions of circuits by adhering colored paper or tape to the tabs.
- Used as a through hole board. Can be any size from 1 row of 4 holes to as large as you want to create the exact size you need.
- Perfect for ribbon cables. Connect exactly how many strips that are needed to your cable.
