

### SchmartBoard PSoC Finally Here

After a very long development cycle, working closely with the great people at Cypress Semiconductor, we are proud to finally announce that our Development Board for the PSoC 3 and 5LP are finally ready for prime time!

As with many of our other development boards, you can choose between multiple ICs and hand solder your choice using our patented "EZ" technology. This board supports both the **PSoC3** and also the **PSoC5LP**.

The **product is priced very aggressively at \$25.00** fully populated except for the PSoC IC. **As a special, if your order between now and April 7th, and type "I Love Schmartboard" in the special instructions at checkout, we will ship your board with a FREE Bootloaded PSoC5LP soldered onto to the board.** That means it will be ready to code with the most powerful PSoC available, right out of the box. The product will ship in mid-April.

### SchmartBoard Around the Web

- Schmartboard was a co-sponsor of the **Phoenix Arduino Hackathon** recently. From what we can see, it was a huge success with many great projects created.
- **Kerry Wong blogged** about our new Texas Instruments MSP430 development board.
- The New T.I. Development board was also covered in the New Products Section of **Nuts and Volts** and **Servo** Magazines in March for those of you smart enough to subscribe to these great magazines.

### Schmartboard Strong in Canada

Schmartboard products are now available through **RP Electronics in Canada**. "RP Electronics has long been 'the' electronics parts source in Vancouver, BC, Canada. And we have been for over 45 years! We are

excited to announce our relocation to our new 6,000 sq. ft. showroom centrally located at Rupert Street and Grandview Highway in Vancouver, BC. Our new larger location allows us to expand our existing selection and introduce many new and exciting lines and products over the months to follow."

### March Special Extended Though April - Free Through Hole Boards!

For every two 10 Packs of jumpers purchased, receive a free **201-0001-01 through hole board**. The 10 packs can be the same or different from each other, and chosen from our female, male or male to female **product family**. To take advantage of the special you must type "Free Through Hole" in the special instructions at check-out.

### Cypress PSoC Contest

In anticipation of the release of our new Cypress PSoC Development Board, we will **give away a free board every month** starting with our April newsletter. Entry is open to everyone starting today. Entering more than once does not increase your odds. We will

announce the first winner next month. Facebook fans may have other opportunities to win, so if you are a Facebook user **"Like"** us today!

The winner of the contest this month is: **Gregg Higham of NextFab Studio in Paoli PA**. His plans for the module: "RGB LED controller, weather station repeater, automotive engine information display."

We regularly give something away on our Facebook Fan Page. [www.facebook.com/schmartboard](http://www.facebook.com/schmartboard)
