

### New Products: Free Breadboard Combos

In May we tested the concept of giving away a free Breadboard with the purchase of 2 SMT to DIP adapters. The offer was very well received. We will now have this option available on a regular basis. We call it the "**SMT to DIP Free Breadboard Combo Pack**".

When you buy the pack of two SMT to DIP adapters for \$12, it comes with a free 830 Test Points Breadboard which normally sells for \$7.95.

### June Special: Daisy Chained Jumpers

For a week in May we offered our **Daisy Chained Jumpers** for \$25. That is \$20 Off!!! It was, as you can imagine, very well received. We have decided to make this our June Special.

### Coming Soon!

Schmartboard will be releasing some new products over the next few months. Here is a sneak peak at what we have coming, some very soon:

- Through Hole Arduino Prototyping shields for regular and Mega platforms. As with other Schmartboard through hole boards, they will have our signature offset grid.
- Surface Mount Arduino Prototyping products. Don't you think QFP, QFN and DFN devices should be accessible to Arduino users? We do!
- PSoC4 Development Board. Our PSoC 3 and 5LP board was our most successful new product to date. The cost effective PSoC4 will most certainly not be forsaken by Schmartboard.
- Raspberry Pi is something we are working on. These users should be able to prototype using the latest technology with such a powerful platform.

Let us know if you think we should be working on something else. Our general rule is to avoid commodities. We should be able to add value or we generally don't consider it. We may be willing to work with you on a project and share in the profits if you wow us with an idea. Contact us at [info@schmartboard.com](mailto:info@schmartboard.com)

### Cypress PSoC Contest

Schmartboard will **give away a free board every month** starting with our April newsletter. Entry is open to everyone starting today. Entering more than once does not increase your odds. We will announce the first winner next month. Facebook fans may

have other opportunities to win, so if you are a Facebook user "**Like**" us today!

The winner of the contest this month is: **James Lummel of Kingman, Arizona**. His plans for the module: "PCM to PPM converter for RC radio control, sync counter for syncing multi-camera video, smart telemetry decoder for RC radio control."

We regularly give something away on our Facebook Fan Page. [www.facebook.com/schmartboard](http://www.facebook.com/schmartboard)
