

### SchmartBoard Newsletter

### August Special - A is for August & Arduino!

Our 3 SOIC Arduino Prototyping Shields are on special for \$10 this month. That is 33% off! They come in three versions: 1.27mm, .65mm and .5mm pitches. Schmartboard has made surface mount components available to Arduino users. These boards utilize our "EZ" soldering technology to assure fast, easy and flawless soldering.

### A Sneak Peak at a New Product & Your Chance to Get a Free Sample

Based on input from users, we have invented a new type of jumper. It is a "4 Way Bus Jumper". The uses are many but in short it allows you to connect multiple points to a single common signal such as ground. It can also be used with electronic testing equipment such as logic analyzers as a signal interceptor to more easily access test points. These 11" jumpers will be available in 5 packs of Black, White, Red, Yellow and Blue sometime in August for \$9.00.

Can you think of another use for these? E-mail us your recommendation and we will send you a free sample in return for your unique use idea. [info@schmartboard.com](mailto:info@schmartboard.com)

### A Few Words About Schmartboard's Wire Jumpers

You will find that the male and female receptacles on Schmartboard jumpers (on the right) are thinner than most on the market which allows you to work better and easier in tight areas. Our Female receptacles fit snugly on .1" and 2mm headers. The Male receptacles work great with both breadboards as well as PCBs. We have also counted the strands of copper in our jumpers' verses those we have found online and many also skimp here. We challenge you to compare ours head to head with others because we know you will immediately understand the difference.

Schmartboard is a leading OEM supplier of custom cables and harnesses. We do require a minimum of 1000 pieces of any type and color. Contact us today for a quotation and lead time at [info@schmartboard.com](mailto:info@schmartboard.com).

### A personal note to our valued customers

As a small but innovative company, we rely on our happy customers to tell their friends and colleagues about Schmartboard. The best place to direct them is to receive a **free demo board and chip**.

Additionally, we invite you to subscribe to any of our social media sites. If you choose to leave a kind word in the comments section, we would most appreciate it!

Lastly, Schmartboard started originally as an engineering services provider. We still offer PCB Design, fab, assembly, and other services. **Please consider getting a quote** from us for your next project. We are good at what we do and priced aggressively.
