New Product SchmartSolder™

Students and hobbyists who are involved in electronics must eventually learn to hand solder components, which is often difficult, messy and frustrating. Even for those with experience, tight spaces can create a nightmare scenario. With the advent of SchmartSolder, anyone can now hand solder through-hole components no matter how close together they are. In addition, the soldering will look like it has been preformed by a pro.

SchmartSolder are loops of solder produced in just the right diameter to fit over the component leads. One places the solder over the lead and flush to the circuit board and simply touches the soldering iron to the SchmartSolder. The SchmartSolder quickly melts and flows into the hole. The result is a perfect, neatly soldered component with no cold solder joints or other flaws.

The suggested retail price on SchmartSolder is \$5.00 for 50 pieces and the product is available on SchmartBoard's website and through SchmartBoard's distributors.

An advertisement for the website 'Solder by Numbers'. At the top, a soldering iron tip is shown applying a solder loop to a circuit board. Below this, the text reads 'solder by numbers™'. The main message is 'Finally, a social network for you, the electronics enthusiast.' Below this, several features are listed in colorful, stylized fonts: 'Design Circuits', 'Earn Commissions', 'Find a Job', 'Join Clubs', 'Make New Friends', 'Chat with VoIP and Webcam', 'Write Blogs', and 'And Much More!'. At the bottom, it says 'Your hobby has finally entered Web 2.0 status. Sign up for your free membership today!' followed by the website URL 'www.SolderByNumbers.com'.
