

SchmartBOARD™ NEWS

Schmartboard Announces Free "Dot Com" T-shirts

Trick or Treat! It's Halloween this month. Why should children have all the fun? We'd like to give you a treat. We have a limited supply of t-shirts from a now defunct "dot com" called brandfans.com. Anyone who orders \$50 worth of product from Schmartboard or one of Schmartboard's U.S. or Canadian distributors gets one as an added thank you, while supplies last.

New SchmartBridge Program

One of the many differences between Schmartboard and competing prototyping boards is the SchmartBridge. This is the plastic piece that in conjunction with the holes on the sides of Schmartboards, allows one to physically connect the Schmarboards together.

Some of our customers have rightly deduced that it would make sense to be able to connect SchmartBoards to existing prototypes. For instance, adding our populated RS232 Schmartboard to an existing prototype to add RS232 functionality.

Schmartboard is now offering the specifications of our holes for use by interested companies. By putting the holes on all of your prototypes, you can easily add Schmartboards via our SchmartBridge to test changes before making more expensive modifications.

This is a free program. For details please contact us at info@schmartboard.com.

Schmartboard Education Program
Educators, be sure to check out our new
education program.

Schmartboard October Contest Winners

Professional Engineers

Timothy Kuo-Cisco Systems, Inc., San Jose CA

Bob Smallwood-GE Healthcare, Laurel MD

Students

Mitchell Warren-Oklahoma Christian University

Sisi Chen-Massachusetts Institute of Technology

Hobbyists

Patrick Mitchell-Duke Energy, Nashville TN

Eric Lundquist-The Robot Group, Austin TX
