

SchmartBOARD™ NEWS

Intellect Lab to Give Customers Free Schmartboards

Intellect Lab is Schmartboard's sister company. Intellect Lab designs and fabricates reference boards, prototypes and full turnkey products for everyone from start-up companies to multi-billion dollar companies. It was while trying to figure out how to save customers' money on prototyping that Schmartboard was invented. For a limited time Intellect Lab will give a 5% rebate in the form of **Schmartboards** to customers of engineering and manufacturing services. You choose the Schmartboards that you want. For example, if you have us do a \$1000 job, you will receive \$50 worth of free Schmartboards!

Show Us Your Schtuff

Schmartboard wants to see your Schmart Projects. We have a section of our website devoted to showing your handy work. If we put up your work, we'll send you a Schmartboard T-shirt. Be the envy of your neighborhood and get your Professor Schmart T-shirt.

Are You On Our Yahoo Groups?

Schmartboard has a Yahoo Groups Page to collaborate with Schmart users. It allows one to quickly talk to Professor Schmart and other Schmart users. To get on this forum go to <http://groups.yahoo.com/group/schmartboardsv>
