

PRODUCT ANNOUNCEMENT

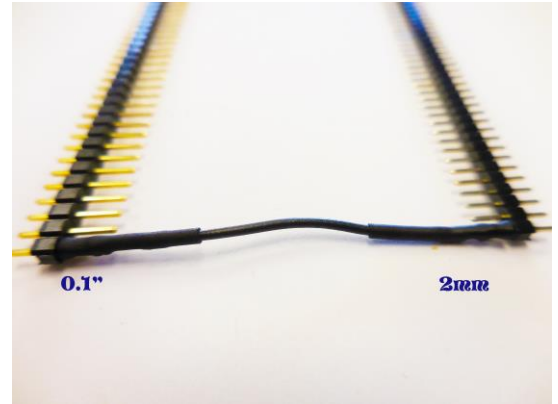

Schmartboard Releases a Solution for 2mm Header Users

Makes it possible to use standard 0.1" Jumpers with 2mm Headers

Fremont, CA – Oct 8, 2019– "2mm to 0.1 Inch Header Converter"

2mm header posts are not easy to work with. You can't find jumpers with a snug 2mm receptacle. Until now you were stuck with cheap loose fitting 2mm receptacles or expensive custom solutions.

The Schmartboard 2mm to 0.1" converter allows you to use standard 0.1 inch jumpers with a 2mm post. Simply slip the 2mm side onto the 2mm post and connect a standard 0.1 inch male header to the other end of the converter. Our receptacles are tighter than most. This is important because you certainly do not want to have a jumper wire as the culprit in a problematic circuit. We made these due to numerous customer requests for a better solution.

The product comes in 10 packs for \$6.00 suggested retail.

Details and a video can be found at: <https://schmartboard.com/2mm-to-0-1-inch-header-converter-923-0001-01/>

About SchmartBoard (www.schmartboard.com)

SchmartBoard™ is committed to helping make the development of electronic circuits faster, easier, and less expensive than previously possible. SchmartBoard's patented "EZ" Technology makes hand soldering of surface mount components fast and flawless. Our products are used by engineers, students, and hobbyists for electronic circuit design work, ranging from simple to the complex.
